

Occupational Health Service **Immunization and Screening Requirements**

To protect our vulnerable patient population, you must meet these infectious disease standards prior to your start date and your new hire orientation.

Please bring with you all screening and vaccine information as described below in ENGLISH. If necessary, please check with your provider, your school, other employers or your family to locate these items.

Bringing documentation will ensure that your start date and orientation date are not delayed!

- ✓ **Tuberculosis Screening**
 - a. Documentation of 2 negative TB skin tests, one within the past year and the second within the past 3 months or a negative TB blood test (T-spot or Quantiferon gold) within the past 3 months.
 - **If born in the United States and working at DFCI for less than 4 months, only 1 TB Test within 3 months of start date is required.**
 - b. If you have had a **positive TB skin test** or positive blood test for TB (T-Spot or Quantiferon gold): written documentation of these results along with a chest x-ray report must be provided. Documentation of treatment prescribed should also be provided.
- ✓ **Measles, Mumps, and Rubella Immunity Required**
 - a. Documentation of two MMR vaccines.
or
 - b. Proof of immunity to measles, mumps, and rubella by titer (blood test).
- ✓ **Chicken Pox Immunity Required**
 - a. Proof of immunity to chicken pox by titer (blood test).
or
 - b. Documentation of two varicella vaccinations.
- ✓ **Hepatitis B Vaccine (only for workforce members who will have contact with blood, body fluids or cells)**
 - a. Documentation of three hepatitis B vaccines **and** positive antibody test by titer (blood test) for hepatitis B.
- ✓ **Influenza Vaccination – Required September- May of each year**
All staff are required to receive the flu vaccine
